

FTP Premium Data Slice

Ingram Content Group collects data from over 26,000 publishers in a variety of formats applying standards as well as grooming the data to provide you the most comprehensive, aggregated, and accurate data in the industry today.

FTP Premium Data slices were created to provide subscribers access only to the product that fits their specific needs. This saves development time and storage space for data maintenance. Most of our slices were created using subject BISAC codes, however we also offer Top Selling slices that will cover all BISAC's.
