Between Earth and Sky

Amanda Skenandore
9781496713667, \$15.95
Kensington Publishing Corporation

On a quiet morning in 1906, a newspaper headline catapults Alma Mitchell back to her past. Alternating between Alma's childhood and her present life, this is a story about the "savage-taming" boarding school that was intended to assimilate the children of neighboring reservations, but instead robbed them of everything they had known. It's the story of Alma's childhood friend, now accused of murder and no longer the bright, courageous boy Alma knew as a child. A quest for justice that ultimately becomes a journey toward understanding and atonement.

Tom and Lovey: Under the Moon into the Wood

G. R. Jerry

\$13.99 • 220 pages • 978-1-64069-710-2

From author G.R. Jerry comes a dark and chilling story of how three characters, on different personal missions and vendettas, converge at the doorsteps of hell.

Stargut, the local sheriff himself, who is on a mission to create the perfect man-beast, brutally sacrificed Lovey's beloved man. After 10 years, Lovey is still on a mission to avenge her murdered husband, Bill. Abandoned by her spellbound friend Patty, Lovey is joined by a stranger.

Tom is a preacher... of sorts. He has followed the scent of evil for a hundred years. Now, he mysteriously appears in the Village of Wrong, the rural Midwestern town, where its mutant inhabitants are mere creations of the devil lawman.

Together the three converge under the moon into the wood down by the river at the doorsteps of hell. Whatever awaits them at the other side of the door is bone-chilling and heart-stopping.

About the Author

Born and educated in north shore suburban Ohio, G.R. Jerry began to nurture his lifetime interest in the macabre at an early age. After completing a military obligation, exploring the U.S. while expanding his mind during his time spent as a working weekend hippie, and an insurance career that ended in Chicago, he turned to putting dreams to words, the mystical, magical, fantastical images of the mind and the horror of it all. He now resides with his wife, Patricia, corralled in a small village of central New Mexico, surrounded by stories and stars of the dark heavens.

You Me Everything

A TENDER NOVEL ABOUT FINDING EVERY BIT OF JOY IN LIFE

9780735224537 | \$26.00 HC | Pamela Dorman Books

Photograph by Stephen Wolstenholme

Born in Liverpool, England, Isaac studied History at the University of Liverpool before beginning her career as a trainee reporter at the *Liverpool Echo*. She rose to the position of Editor of the *Liverpool Daily Post* and wrote her first book, *Bridesmaids*, under the pseudonym Jane Costello. *You Me Everything* is her first book writing as Catherine Isaac as well as her American debut.

“ I crunch onto a sandy driveway, as the flutter of my heart makes me wonder for a moment whether I’m actually pleased at the idea of being on holiday. ”

As we’re surrounded by serried rows of walnut trees and swirls of lush foliage, our GPS finally announces that we have reached our destination. Given that we’re miles from anywhere, our GPS is very clearly talking crap.

I root in the glove compartment for the map I’d hoped I wouldn’t have to use and, after several wrong turns, find my way to a junction pointing to Château de Roussignol. I crunch onto a sandy driveway, as the flutter of my heart makes me wonder for a moment whether I’m actually pleased at the idea of being on holiday. I suppose it is allowed, even if it does mean being around Adam. There was a point when I hated him, but that’s not an emotion that comes naturally to me. I found it exhausting.

So I’ve been the definition of civilized for a long time—smiling, for William’s sake, when he’d arrive to pick him up; exclaiming “how fantastic!” when our son would return extolling the gastronomic virtues of the McDonald’s Happy Meal to which he’d been treated.

Even if I did want to waste time and energy resenting Adam, I don’t have it in me with everything else going on. These days, I’m numb to him. I go along with the pretense that he’s in France because that’s where work has taken him, not because he never wanted to bother with anything as mundane as monogamy and fatherhood.

My son stirs and sits up, rubbing his eyes as we are rewarded with our first glimpse of Château de Roussignol. I’ve only seen it in pictures, in every state of renovation, right from the beginning when it was a neglected wreck.

That was in the days before William was old enough to talk, when Adam would email me intermittently, attaching

pictures of the château. Everyone thought he was mad when he first bought it. You could tell there was a grand building somewhere beyond the thickets of overgrown bushes and unkempt gardens. But it had no electricity, mice under the floorboards and a sanitation system from the Dark Ages. But Adam, for all his faults, was always single-minded enough to make it work.

As the emails dropped into my inbox each month for three years, I got an insight I never asked for and never wanted into his new life: his hours of physical toil, his obsessive approach to planning, the ludicrously ambitious vision he had for the place. I worried endlessly about the financial risk he was taking and how it would affect his ability to contribute to the cost of raising William, without which we wouldn’t have survived in the early days.

I read the emails with a mixture of intrigue, jealousy, anger and despair. But with hindsight I think his main motivation for sending them was merely an almost childlike need to prove that he was really making something of himself.

When the château was nearing completion and our son approached his third birthday, it was apparent Adam had managed to pull it off.

I refused to let myself be bitter, at least not about his success, which he’s worked hard for. Though I’ll admit I could never *quite* believe how quickly he started dating someone else after our split—while I was adjusting to life with sore nipples, no sleep and the idea that a successful day meant brushing my teeth before 3:00 p.m.

“Are we here?” William asks, brightening. “Wow, it’s amazing, isn’t it?”

“Most of the time, I find it hard to remember feeling that way about him myself, but logic tells me I must have, because we were together for more than three years...”

“Sure is. Your dad’s done a great job.”

The château is disarmingly beautiful, more of a French manor house than my idea of a castle, but with all of the grandeur and neoclassical glamour you could wish for.

It’s three stories high, with a silvery grey roof that slopes towards the biscuit hues of its walls and huge windows, flanked by elaborate shutters painted the color of seashells. Two ancient stone steps with an intricate wrought iron bannister lead to an oversize arched doorway. A high ivy-strewn balcony overlooks the graveled driveway and feathered cypress trees. Pots of brightly colored flowers line the outside of the building.

We bump along in silence, the scent of thyme and bellflowers hanging in the air as the only sounds to be heard are the chirrup of nightingales and soft rustle of the breeze.

“I can’t wait to see Dad,” William says. “Is he coming to meet us?”

“He’s going to try. He told us to head to reception as soon as we arrived.”

Adam swore that he would rush out and throw his arms round William the second we appeared, but I’m playing this down. Given that this is Adam we’re talking about—and that he hasn’t responded to the text I sent an hour ago when we stopped for petrol—I’m not prepared to risk it. I turn off the engine and open the door.

“Let’s go and see if we can find him,” I suggest, swinging my legs out of the car.

“He won’t recognize you. You must’ve grown two inches since he last saw you.”

We’ve only seen Adam in the flesh once since Christmas, when he was staying in London at his new girlfriend Elsa’s place. Like many of the women Adam has dated since me, Elsa is several years younger than he is and is positively breathless in his presence, at the mercy of a twinkly look from those brown eyes.

Most of the time, I find it hard to remember feeling that way about him myself, but logic tells me I must have, because we were together for more than three years, in love for at least some of that time, and managed to make a baby together, albeit by accident.

That was before I realized that when Adam had said he’d never wanted to be a father, he really meant it.

He was the first to admit he wasn’t cut out to be the kind of father I had. My dad was far from perfect, but his love still shone through in every hour he spent playing with my dollhouse with me or, when I grew up, teaching me to drive. That kind of thing didn’t appeal to Adam, even after fatherhood had become not a lifestyle decision but an unavoidable reality.

All of which is why I had to end our relationship. It was one of the hardest things I’ve ever done. But I had no choice.

This was bad. This was so very bad.

He ran full tilt, ghosting through the trees. The branches and brambles reached out and extracted their price in blood and flesh for running at such speed through their territory. He could feel the ground absorb his blood and his sweat—feel it stir at the taste. *Dangerous*. Feeding the earth with his blood when he was so upset was not wise.

He almost slowed his feet.

No one was chasing him.

No one had even known he was there. They'd seen the trees who'd obeyed his will, but they had not seen him. The trees... he might have to answer to her for the trees.

He could just go back. Go back and teach them what they got for touching someone he loved...

No.

Her voice again, ringing in his ears with power. She was his dominant, though he was so much older, so much stronger. As such, she wielded power over him—a power that he'd given her out of love, out of despair, out of desolation. And their bargain, their mating bond (her word, then his) had worked for a very long time.

Anyone who cared to look around would know how well her hold on him had worked—there were still trees on this mountain, and he could hear the birds' startled flight as he ran past them. If that bargain had failed, there would be no birds, no trees. Nothing. His was an old power and *hungry*.

“ His beautiful werewolf mate had brought love to his sterile existence. When that hadn't been enough, she had brought order to his chaos as well. ”

She'd told him to run, and he had paused to call the trees. That was not how their bargain was supposed to work. But he couldn't just let them take her, not when it was within his power to stop it.

Think. Think. Think. The words were his, but he heard them in her voice. She'd worked so hard to give him rules. The first rule was *think*.

It was funny that everyone believed that she was the danger, that she was the crazy one. Very funny—and his lips stretched in a grin only the forest could see. It wasn't amusement that caused his feral smile. He wasn't sure exactly what the emotion was, though it was fueled by an anger, a rage so deep that the earth, aroused by his blood, rose eagerly to do his bidding. The earth, out of all the elements, was the hardest to wake but the most eager for violence.

But their mating had given him balance, given him safety. His beautiful werewolf mate had brought love to his sterile existence. When that hadn't been enough, she had brought order to his chaos as well.

Order...that word...No, orders was the word that sifted through his roiling thoughts. She had given him *orders* for this situation.

He vaulted over a deadfall with the grace of a stag.

Call the Marrok, she had told him. And also, *Right the hell now*. That was the correct task. Call the Marrok for help. But the reason for his speed—his *right the hell now*—was because if he allowed himself to slow, he would turn around and...

The mountainside groaned beneath his feet. A soft shift that only someone like him—or like his true love—would feel.

His fleet footsteps...which had slowed...resumed their former speed. She was alive, his love, his mate, his keeper. She was alive, and so he had to call the Marrok and not raise the mountains or call the waters.

Not today.

Today, he had to call the Marrok and tell him...and his mate's voice rang in his head as if she were running by his side.

I know who the traitor is...

Charles tipped his father's computer monitor so that it was at a better angle and wiggled the keyboard until it felt right.

He'd told Bran that he could run the pack just fine from his own home while Bran was gone, just as he had the last dozen times that the Marrok had to be away. But this time had looked as though it might last awhile, and his da had been adamant that it was important to keep the rhythms of the pack the same.

It wasn't that he didn't understand his da's reasoning—some of the hoarier wolves under his da's control weren't exactly flexible when it came to change—but understanding didn't make it any easier for Charles to function in his da's office, his da's personal territory.

Charles couldn't work in the office without making it his own—and wasn't that just going to set the fox among the hens when his da got back and had to reverse the process. But Bran would understand, as one dominant male understands another.

Charles had to admit, if only to himself, that he'd moved the mahogany bookcases to the other side of the room and reorganized the titles alphabetically by author, instead of by subject matter, just to mess with Bran. Anna, he thought, was still the only person on the planet who honestly believed he had a sense of humor, so he was pretty sure he could make his da believe the rearrangement was a necessity.

Charles hadn't moved the bookcase until Bran called him this morning, not quite a month after he'd left the pack in Charles's keeping, to let him know that his initial business was concluded—and Bran had decided he would take another week to travel.

Charles couldn't remember the last time Bran had taken a vacation from his duties. Charles hadn't realized that his da was capable of taking a vacation from his duties. But if the rearrangement of Charles's life was no longer essential, just required, then he felt free to make some changes to make his life easier. And so he'd rearranged his da's office to suit himself.

About the Book

In his book Utilitarianism, John Stuart Mill refers to the great objects of human life. We may assume that what Mill calls an object is the same as an objective in modern parlance. The examples of great objectives that Mill cites include power, fame, and money. One wonders how seriously Mill was actually endorsing such aims to be the overarching objectives of living or whether he was simply expressing his finding that many people actually do take such aims as these for life. The contention is that Mill was indeed recognizing that people do choose such goals in life. After all, happiness has been recognized as an objective of life at least since the time of Aristotle, and virtue has a similarly ancient pedigree. It is quite common for ordinary people to adopt such mottos as “Healthy, wealthy, and wise” as aims for life. But we know that having more than one such value can lead to conflicts. This had been a concern to Sidgwick as well as other nineteenth-century moralists.

A resolution to the problem was found by the time of the twentieth century, when it was realized that we should not try to achieve definite objectives, but instead look to some other procedure, such as a variety of evolution, to shape our objectives. In that case, we make plans and evaluate them, as we proceed. We should use our values, as Dewey recommended, for guideposts.
